## **ABOUT HAIR LOSS**

Hair loss can be an emotional issue, having a negative impact on a person's sense of self confidence and self image. It's also a common problem. More than half of the population suffers from the most prevalent form of hair loss, male or female pattern balding. Thankfully hair transplantation has evolved to become a popular and accepted solution to permanently correct hair loss in men, women, and more rarely, adolescents.

## **ABOUT US**

The Hair Transplant Centre (HTC) was formed in 1986, is manned by four renowned Board Certified Dermatologic Surgeons (M.D., F.R.C.P.C.) and supported by the most experienced team of Registered Nurses and Technicians in Western Canada. Our location is in the Skin Care Centre, Vancouver, BC, housing the Clinical Division of Dermatology to the University of British Columbia and affiliated with The Vancouver Hospital & Health Sciences Centre. The reputation of the Centre is excellence and innovation, with uncompromising results. As well as a private Specialist, each HTC surgeon is a full or Assistant Clinical Professor and our link to both facilities goes hand in hand with the high ethical standards we proudly set in the industry. Always looking to the future, we also fund and advance research at UBC on the causes and treatment of hair loss.

## ABOUT SURGICAL HAIR RESTORATION

Natural hair transplantation is a surgical procedure, performed in fully appointed and inspected surgical facilities. In essence, a strip of hair bearing scalp is removed from the permanent 'donor' area at the rear of the head, dissected into follicular unit grafts, and inserted into miniature strategically angled slits at the required recipient sites. The hair is not restricted in its growth or form of styling, will grow forever and survive as long as you do.

## CHOOSING WITH CONFIDENCE

Much has been written on modern transplant procedures and anticipated results. It can be difficult to decide which 'Company' should complete your HT. Surgical hair transplantation should not simply be judged on numerics. Numbers of follicular unit grafts vs actual hair bulbs attainable from the harvest area can be misleading. The centre must also be judged on the artistry of the final result. They must ensure all patients have realistic expectations, and they need to provide patients with an unsurpassed level of confidence, caring and empathy. The Hair Transplant Centre meets all these criteria.

## COMPLIMENTARY CONSULTATION

We are sure you have many questions regarding permanent hair restoration and warmly invite you to call us for a complimentary consultation, in a no pressure environment you can trust. We will fully educate you to allow you to consider ALL your options, and assess the benefits.
