

OTHER FILLERS FREQUENTLY ASKED QUESTIONS

FAQs	Other Fillers (Zyplast, Reviderm, Collagen, etc.)
What is it?	Various types of fillers can be used to plump up the skin, reducing the appearance of fine lines, acne scars or other depressions in the skin. Similarly these products can be used to enhance your own natural features, such as lips.
How is the procedure done?	The fillers are injected under the skin using a fine gauge needle.
What are the side effects?	Swelling and slight bruising may be present at the injection sites, which will resolve within a few days. Swelling may be more noticeable for some preparations (Hylaform, Reviderm).
How long does it last?	Depending on the product that is used anywhere from 3 weeks to 18 months.
Does the treatment hurt?	Depending on the area to be treated there may be moderate discomfort. The doctor may choose to freeze the area first using a topical or injectable anesthetic.
How much down time is there after treatment?	None.
What is the after-care following treatment?	If there is swelling present, ice may be used.
May I put makeup over treated area?	Yes.
How Long does the procedure take?	15 - 30 minutes
